

How to safely recycle your computer.

- 1) Backup all your files to a portable hard drive or flash drive
- 2) Unplug all the wires and open the case (remove 2 screws)
- 3) Disconnect the hard drive (2 cables)
- 4) Break the connection tab.

The following example is for a traditional desktop computer.

The following example is for a laptop computer.

The last step is to  
break the plastic connectors

That's it, now you're ready to take all the parts to your local recycling depot.
